

REACH / ECHA – Confirmation of Supply Safety and Product Quality

We hereby give assurance that our products do not contain more than 0.1% of any substances of very high concern (SVHC) from the ECHA candidate list, pursuant to Art.33 of the REACH Regulation (Regulation (EG) Nr.1907/2006).

The suppliers of the raw materials that are used in our products in relevant amounts are equally obliged to inform us without solicitation if one of the substances supplied by them contains more than 0.1% of one of the substances named on the ECHA list.

Should we received information in this regard from one of our suppliers and thereby be made aware that our products also exceed the 0.1% mass threshold for an SVHC substance, we reserve the right to adapt our formulations. Should you be affected by such adaptations, we will, naturally, full and promptly inform you
